Project Overview:

- Development Trends:

Active Periods: **Scott Alexander-Bown** focused on **critical modules** like CheckForRootWorker and RootBeerNative, indicating a deep involvement in core functionalities. **Scott** showed **intensive activity in May**, while **Matthew** has been **consistently contributing**, showcasing a sustained commitment.

Potential Concerns: Some contributors, such as **Mohammed Ezzat**, **leocadiotine**, **vyas**, and **altvnm** have shown **minimal or no recent activity**, raising **concerns** about their continued engagement.

Team Recognition: **Acknowledge** the outstanding contributions of **Scott Alexander-Bown** and **Matthew Rollings** in meetings to **boost morale** and emphasize the importance of their work.

Engagement Strategy: **Reach out to contributors** with minimal recent activity, such as **Mohammed Ezzat**, **leocadiotine**, **vyas**, and **altvnm** to understand their status and **encourage active participation**.

- Git Commands Used:

Git Log: Utilized to trace commit history, identify active contributors, and pinpoint recent code changes.

Git Blame: Applied to specific files for detailed insights into individual contributions.
